TSR strategic areas

Comprehensive services

in the field of secondary raw materials

Processing of metals

Worldwide trade of secondary raw materials

Our target groups

THE METAL COMPANY

RECYCLING

Scrap metal suppliers:

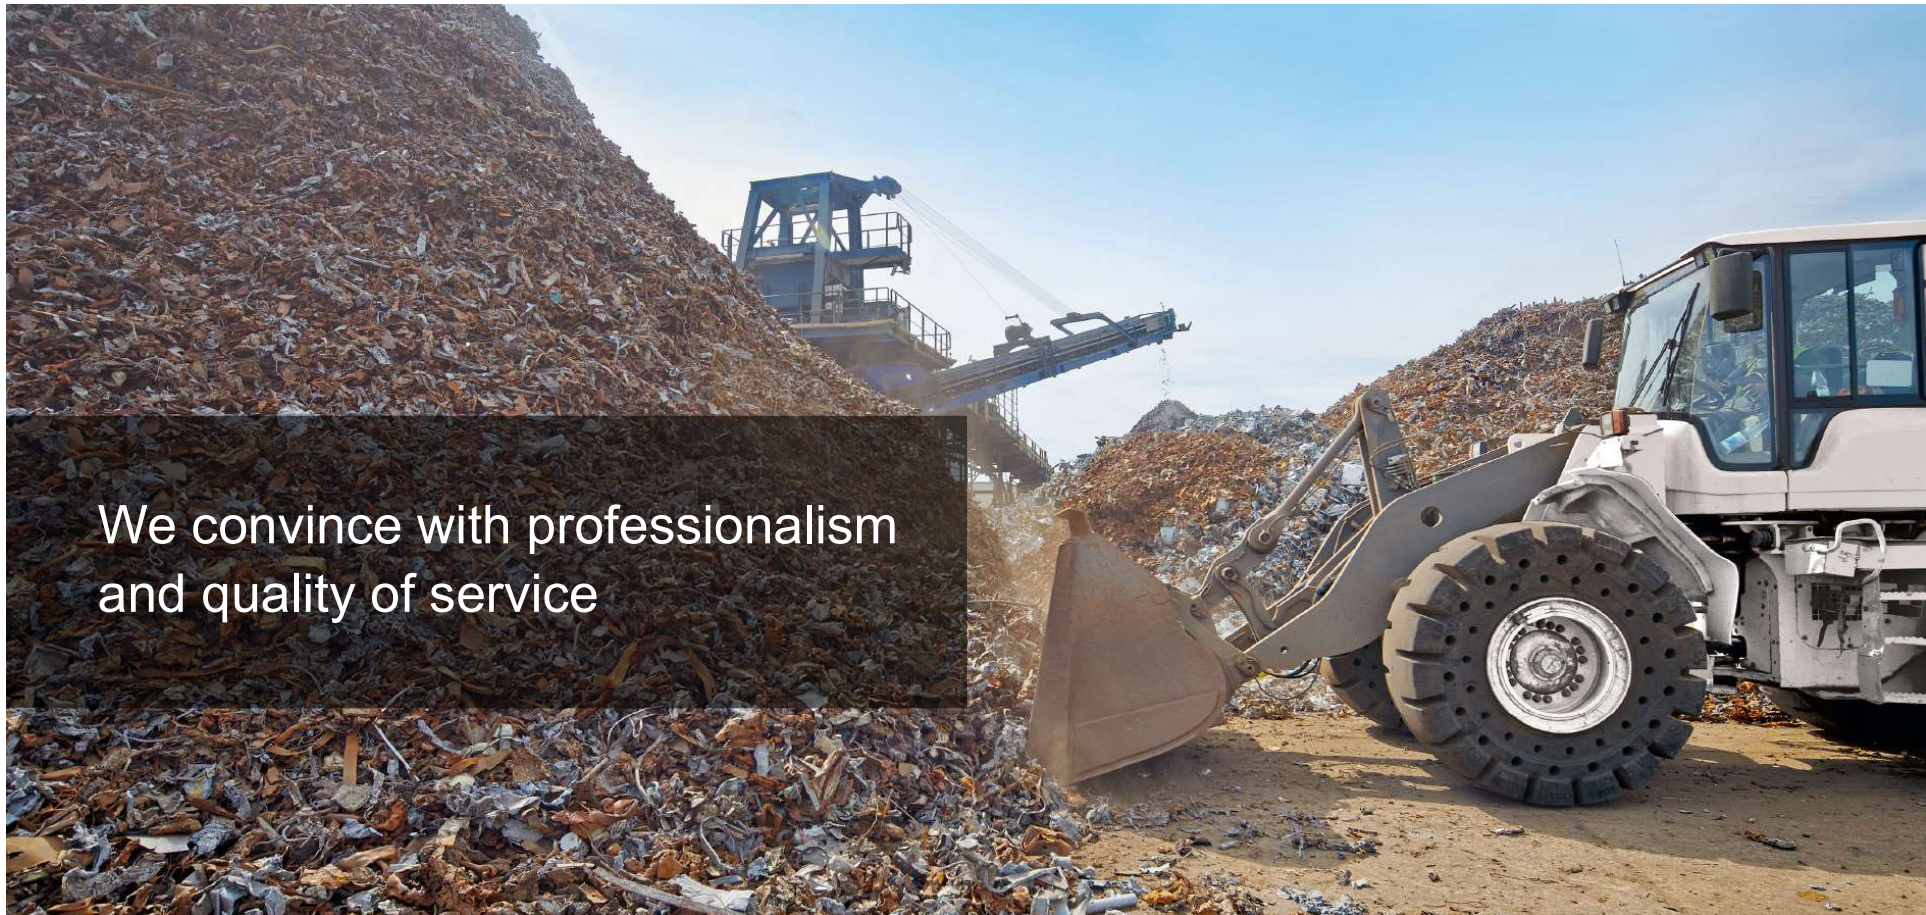

- manufacturing companies
- scrappers
- tradesmen/craftsmen

Customers of processed metal. waste:

- smelteries
- foundries **in the EU**
- steelworks

Our services

We convince with professionalism
and quality of service

Our services – logistics

Thanks to our own modern collection and handling technology, we manage metal waste exactly according to your requirements.

Our services – processing

Scrap processing with our own modern technology all around the Slovak Republic

Our services – recycling

Metal recycling is a closed circle: dismantling/receiving and sorting at the beginning, with subsequent processing bringing the metal waste back into the production process. In this way, TSR saves the environment and raw materials during production.

Using powerful and modern machines, we process the material efficiently and precisely according to your requirements.

Trade

TSR trades internationally in all common ferrous and non-ferrous scrap metals. Quality of service, reliability and transparency are the most important pillars of our business philosophy.

TSR trades in all common metal scrap:

steel waste

non-ferrous metals

steel mill waste

declassified steel

Active environmental protection

Noise barriers

TSR invests millions of crowns annually in the modernisation of its facilities to protect the environment

Paved areas

Radioactivity control

Reference

TSR Slovakia, s. r. o. is a long-term partner of major industrial companies
